## HEALTH AND SAFETY MANUAL

### HEALTH AND SAFETY POLICY

It is the policy of this Company to give the greatest importance to Health and Safety, considering this a Management responsibility equal to that of any other function.

In the design, manufacture, use and maintenance of all plant, equipment and facilities, it is the duty of Management, including Supervision, to do everything reasonably practicable to prevent personal injuries, and to promote a safe working environment. To this end, management will provide such safety devices, protective equipment and working conditions which may be required, to ensure that the requirements of the Health And Safety At Work Act are adhered to. It will also ensure that all personnel receive adequate safety training.

Equally it is the duty of all employees to act responsibly and to do everything reasonably practicable to ensure the safety of themselves and others. This includes the use of safety guards, protective equipment etc, to obey safety rules and warning notices, and reporting promptly any accidents and potential hazards.

In furtherance of this Policy, there will be joint consultation on Health and Safety matters, as appropriate within the Company.
